Imagine... a fully engineered steel building that goes together without one single nut, bolt or washer...you can build it yourself...or a professional install is available within most of Arizona!

The slip-fit connections make assembly a snap. Standard frame packages can be assembled in hours, not days!

As seen on HGTV!

The "Stand Alone" Frame System

Unlike other steel frame systems, Absolute Steel structures can easily accommodate other exteriors such as wood, stucco, brick, etc.

STANDARD SIZES:

Buildings:

Widths - 12', 14', 18', 20', 24' and 30'
 Lengths - 20' + (extendible in 4' or 5' increments)
 Heights - 7.5' + (extendible in 1' increments to 12.5')
 Available Options: Pulin/Girt system, Soffit, Custom door/window opening

Carports:

Widths - 10', 12', 14', 18', 20', 24' and 30'
 Lengths - 20' + (extendible in 4' or 5' increments)
 Heights - 7.5' + (extendible in 1' increments to 12.5')

Residential Storage Buildings:

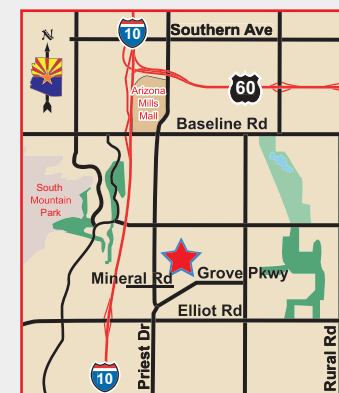

Widths - 8', 10' and 12'
 Lengths - 10', 12' and 15'
 Heights - 7'

HOA Compliant Models Available

- Uses heavy-duty 2" x 3" rectangular galvanized steel tubing for years of maintenance-free rust-resistant service.
- Can be finished in a variety of attractive colors and trims to suit your taste.
- Termite and fire resistant.
- Less expensive than other forms of construction. The cost is about 40% less expensive than a wood structure.
- Can be installed on the ground, on gravel, on a concrete pad, or on caissons.
- Environmentally friendly. 67% of all steel is recycled.
- Engineered to meet wind and snow loads for most areas.
